

Digital art forms as a way of expression

Digital Art brings together Art, Technology, Math and Science

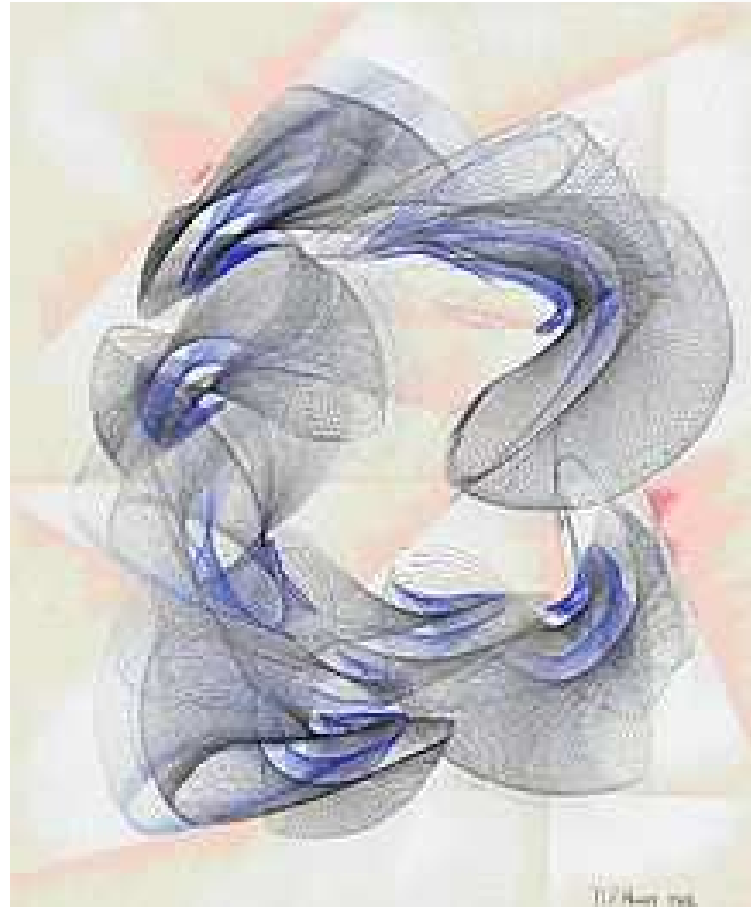

- Digital art is created with digital technology. Digital art:
 - art whose final product is digital in nature,
 - art that was created using digital tools,
 - art whose subject is digital.

Digital art is still art.

(Digital art uses technology-based tools, it incorporates the same concepts of traditional art, including composition and form.)

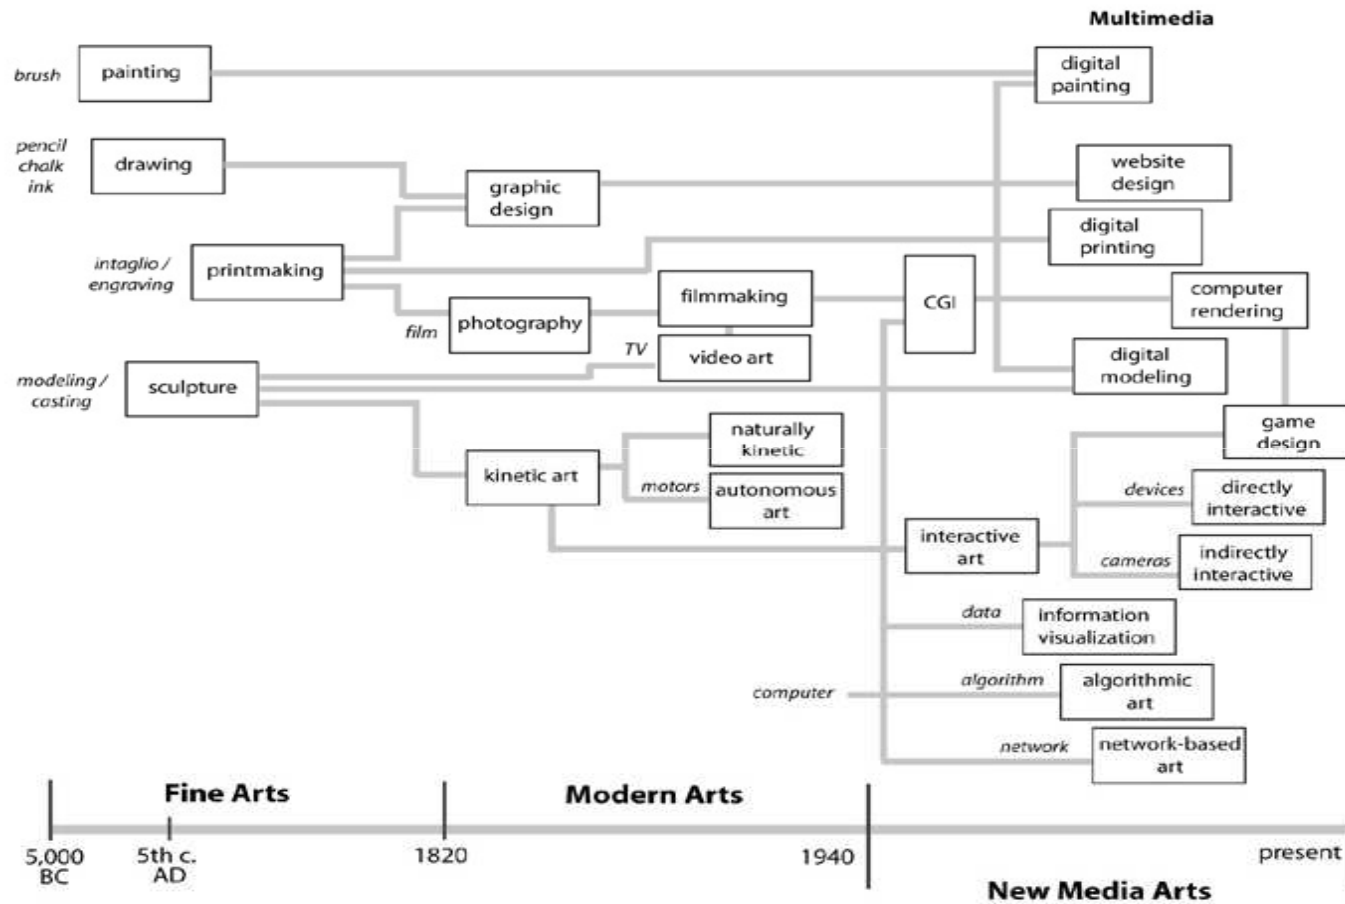

Austin Museum of Digital Art
